Microorganisms

376. AN1 MEDIUM

Trypticase (BBL)	10.0	g
K ₂ HPO ₄	1.5	g
NaCl	2.5	g
Na-thioglycolate	1.0	g
Sulfur, powdered	8.0	g
Resazurin	1.0	mg
Distilled water	1000.0	ml

Adjust pH to 7.3.

Prepare the medium anaerobically under 100% nitrogen. Sterilize thioglycolate and sulfur separately. Sterilize the sulfur by steaming for 3 h on each of three successive days.
