

63a: DESULFOTOMACULUM (14.5) MEDIUM

| Solution A | 980.00 | ml |
|------------|--------|----|
| Solution B | 10.00 | ml |
| Solution C | 10.00 | ml |

Dissolve ingredients of solution A, bring to the boil, then cool to room temperature while sparging with 100% N_2 gas. Add solutions B and C, adjust pH to 7.8 with NaOH, and distribute under 100% N_2 gas atmospherer into anoxic Hungate-type tubes. During distribution continuously swirl the medium to keep the grey precipitate suspended. Autoclave 15 min at 121°C. Check medium pH after autoclaving and adjust to 6.8 - 7.0, if necessary.
