

63c: DESULFOVIBRIO MEDIUM (CHOLINE)

Solution A	980.00	ml
Solution B	10.00	ml
Solution C	10.00	ml

Dissolve ingredients of solution A, bring to the boil, then cool to room temperature while sparging with 100% N₂ gas. Add solutions B and C, adjust pH to 7.8 with NaOH, and distribute under 100% N₂ gas in anoxic Hungate-type tubes. During distribution continuously swirl the medium to keep the grey precipitate suspended. Autoclave 15 min at 121°C. Check medium pH after autoclaving and adjust to 6.8 - 7.0, if necessary.
