

MSDS-Material Safety Data Sheet ELISA reagents

ELISA (enzyme-linked immunosorbent assay) reagents contain purified antibodies from rabbit (IgG) and/or mouse (Mab) and antibodies conjugated with alkaline phosphatase (IgG-aP, RaM-aP).

Intended use

ELISA reagents are for the detection of plant pathogenic viruses. All products are for in vitro use only. They are not to be used for human or animal applications. The customer is solely responsible for determining the suitability of the goods for the purpose which they intend to use them.

Biohazard

The reagents contain 0,05% sodium azide (NaN_3) which is toxic when swallowed and irritant if it comes in contact with skin, eyes and mucosae; nevertheless, these products are not considered to present a hazard to health when used in accordance to the principles of Good Laboratory Practice and Good Standards of Occupational Hygiene.

Storage and stability

DSMZ products have a guaranteed minimum shelf life of 6 month from the date of delivery when stored according to the specifications. No further warranties are given.

The above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide.

DSMZ shall not be held liable for any damage resulting from handling or from contact with the above products.
