

A WEBINAR SERIES HOSTED BY THE DSI SCIENTIFIC NETWORK

A MULTILATERAL SOLUTION TO THE DSI DILEMMA?

These events organised by the DSI Scientific Network will focus on researchers' experience and priorities regarding DSI. Panellists will discuss the implications of an access and benefit sharing (ABS) system for digital sequence information (DSI) in the context of the Convention on Biological Diversity, reflecting on lessons learned from existing ABS arrangements, such as under the Nagoya Protocol and the ITPGRFA.
