

## Certificate of Origin and Analysis for BRUKER Quality Control Strains

We declare that the following DSMZ culture

DSM-No. Strain	Batch-No.	Risk Group
DSM 50071 <i>Pseudomonas aeruginosa</i>	Jan 2021	2

√ is an authentic DSMZ culture derived directly from the strain held in the DSMZ  
√ has been produced in DSMZ laboratories at the address given below  
√ is of German preferential origin  
√ has been tested by DSMZ control procedures with respect to purity and identity

### Viability

Viability of the above batch was tested by subculturing.

### Purity

Purity of the above batch was checked after production. This check included microscopical and macroscopical observations and selected physiological, chemosystematic and molecular based tests.

### Authenticity

Authenticity of the above batch was checked by the following techniques:

- API® (Analytical Profile Index)
- Whole cell fatty acid composition
- RiboPrinting® (molecular characterisation)
- MALDI-TOF mass spectrometry (BRUKER; see next page)

Date: February 3, 2021
