

## Certificate of Origin and Analysis for BRUKER Quality Control Strains

We declare that the following DSMZ culture

DSM-No. Strain	Batch-No.	Risk Group
DSM 50071 <i>Pseudomonas aeruginosa</i>	Oct 2022	2

√ is an authentic DSMZ culture derived directly from the strain held in the DSMZ  
√ has been produced in DSMZ laboratories at the address given below  
√ is of German preferential origin  
√ has been tested by DSMZ control procedures with respect to purity and identity

### Viability

Viability of the above batch was tested by subculturing.

### Purity

Purity of the above batch was checked after production. This check included microscopical and macroscopical observations and selected physiological, chemosystematic and molecular based tests.

### Authenticity

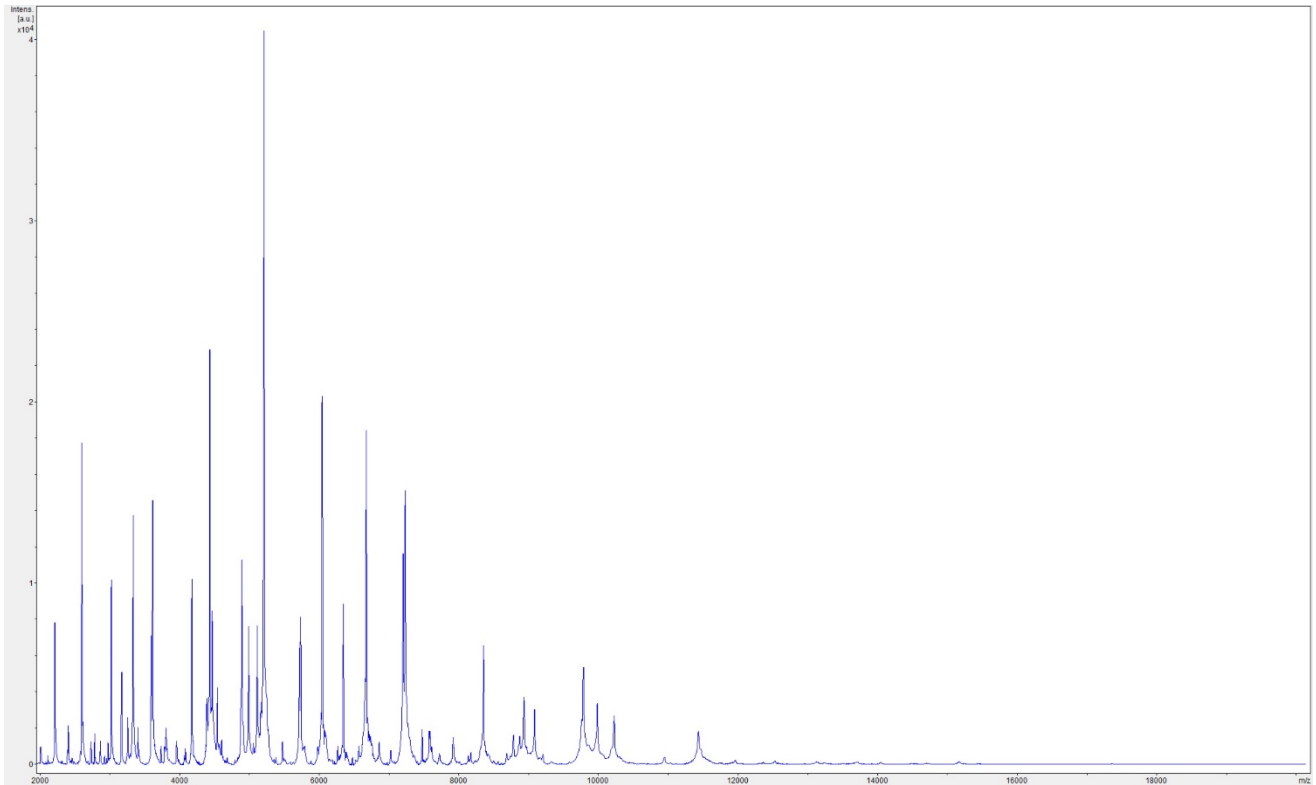

Authenticity of the above batch was checked by the following techniques:

- API® (Analytical Profile Index)
- Whole cell fatty acid composition
- MALDI-TOF mass spectrometry (BRUKER; see next page)

Date: October 17, 2022

Dr. Sabine Gronow, Leibniz-Institut DSMZ-Deutsche Sammlung

**DSM 50071 *Pseudomonas aeruginosa* (Oct 2022)**

MALDI-TOF mass spectra acquired on a MALDI Biotyper system (microflex LT mass spectrometer) at Bruker. The respective spectrum is stored at Bruker.
